

# Buckeye® Fortified Cockatiel Mix

# 71425

TYPE OF FEED Complete  
FORM OF FEED: Mixed Grains  
PACKAGING: 25 lb Paper Bags  
SPECIES: Cockatiels  
AGES: All life stages

---

## FEATURES:

- Mix of clean, high quality seeds that cockatiels prefer
- Includes a high quality pellet containing amino acids, mineral and vitamins specifically designed for fortifying Psittacine diets
- Contains a percentage of colored seed which also carry additional vitamin fortification
- Additional calcium is provided through a small amount of oyster shell in the mix
- Contains no medication

## GUARANTEED ANALYSIS

Crude Protein, min.	15.0%
Crude Fat, min.	8.00%
Crude Fiber, max.	16.00%
Calcium, min.	0.40%
Calcium, max.	0.90%
Phosphorus, min.	0.45%
Salt, min,	0.10%
Salt, max,	0.60%

INGREDIENTS: White Proso Millet, Canary Seed, Sunflower Seed, Safflower Seed, Oat Groats, Siberian Millet, Wheat, Vegetable Oil, Ground Corn, Corn Gluten Meal, Fish Meal, Dehulled Soybean Meal, Dried Egg Product, DL-Methionine, Lysine, Calcium Carbonate, Oyster Shells, Calcium Phosphate, Salt, Potassium Chloride, Magnesium Oxide, Manganous Oxide, Ferrous Sulfate, Copper Sulfate, Zinc Oxide, Ethylenediamine Dihydriodide, Sodium Selenite, Vitamin A Supplement, Vitamin D<sub>3</sub> Supplement, Vitamin E Supplement, Menadione Dimethylpyrimidinol Bisulfite (source of Vitamin K Activity), Riboflavin Supplement, d-Calcium Pantothenate, Niacin Supplement, Vitamin B-12 Supplement, Choline Chloride, Folic Acid, Pyridoxine Hydrochloride, Thiamine Mononitrate, Artificial Color.

FEEDING DIRECTIONS: See Second Page

## **Buckeye® Fortified Cockatiel Mix**

### **Feeding Guide**

Cockatiels require only a small amount of food. Food must be clean, and available at all times. A cockatiel cannot survive a period of 24 hours without food. Offer slightly more Buckeye® Cockatiel Mix than the bird will consume during a normal feeding period.

This premium mix is composed of pellets with specific ingredients, which contain amino acids, vitamins and mineral to compliment the seeds in the mix. The mix also contains colored seeds that have been coated with additional vitamins and sunflower seeds that contain hearts that are an excellent source of Vitamin E. Extra vitamin and mineral supplementation is not necessary if a minimum of 25% of the pellets contained in the mix are consumed by the bird. Be careful if feeding supplemental vitamins and minerals- over supplementation may cause damage.

Seeds should be changed daily to remove seed hulls and rejected seed. The hulls and rejected seeds will account for approximately 25% of the mix. The feeder should be of a shape and in a location so as not to be contaminated by bird droppings and become a source of disease to the birds. Always maintain a source of clean, fresh water. A drip type waterer is preferred so as not to spread infections through the watering system, this is particularly true where a number of birds drink from the same waterer. Offer the bird a cuttle bone as a source of minerals such as calcium and phosphorus. Grit may be made available to the bird although this is not a requirement. Store the unused container of Buckeye® Cockatiel Food in a clean, well ventilated area where it cannot be contaminated by rodents, insects, or possibly disease carrying birds. When changing to Buckeye® Cockatiel Food from another food, mix the seed with the former mix until the birds become accustomed to the new diet.

**To maintain freshness store in a cool dry environment. For extended storage keep refrigerated.**
