

Buckeye® Rabbit Developer Pellets

60I25, 60I50

TYPE OF FEED Complete

FORM OF FEED: Pellet

PACKAGING: 50lb Paper Bags

SPECIES: Rabbits

AGES: Young and adult

FEATURES:

- Designed for young, growing, rabbits, rabbits in heavy production, and rabbits conditioned for show.
- Heavily fortified to support rapid growth rates
- Higher energy levels for maximum milk production
- Added fat (rather than carbohydrate) provides extra energy, minimizing the risk of enteritis
- Proper ratio of carbohydrate and fiber
- Higher fat level promotes shiny, full hair coat
- Contains Yucca Schidigera Extract to help control ammonia odor

FEEDING DIRECTIONS: Offer Buckeye® Rabbit Pellets free choice to both young and adult rabbits in a rabbit feeder or a clean feed bowl. Rabbits are basically nocturnal feeders and will consume most of their feed at night. Do not feed more than they will consume in one day.

Some general guidelines for feeding are:

Amount Fed/Day

Small breeds	2 – 3 oz
Medium breeds	3.5 – 4 oz
Large breeds	5 – 8 oz

Rabbits will consumer approximately 1 ounce of feed per pound of body weight per day or approximately 6% of body weight per day. The amount fed to breeding may need to be limited to maintain proper body weight and condition for top reproductive performance. Growing rabbits and lactating will require more food per day. No supplemental vitamins, minerals, or hay is necessary since Buckeye® Rabbit Pellets are nutritionally complete and balanced. Clean fresh water should be provided at all times. Follow a strict program to prevent disease.
